## WAITING ROOM FOR LPS DIRECT

### DESIGN

**PROJECT OVERVIEW:** LPS Direct was tasked with designing, building, and furnishing a waiting room for a corporate client. The objective was to create a welcoming, comfortable, and functional space that accommodates visitors' needs while reflecting the company's professional image.

**DESIGN CONCEPT:** The design prioritized seating comfort and capacity, ensuring there was enough comfortable seating to accommodate the expected number of visitors. Entertainment and information options were provided, including magazines, TV, and Wi-Fi, to keep visitors engaged during their wait. A children's area was included where applicable, featuring toys and books to keep young visitors occupied. Refreshments such as water, coffee, and tea were offered to enhance visitor comfort. The lighting was designed to be bright and welcoming, with an emphasis on natural light where possible. The noise level was kept

### BUILD

peaceful, with soft background music to create a relaxing atmosphere. Cleanliness and sanitation were emphasized, with plans for regular cleaning and accessible hand sanitizers to maintain a hygienic environment.

**INSTALLATION CHALLENGES:** When installing the waiting room, an open layout with clear pathways was designed to ensure easy navigation. Comfortable and durable seating options were chosen to accommodate different needs and preferences. The aesthetics of the room were carefully considered, creating a welcoming atmosphere with soothing colors, artwork, and decor.

Adequate lighting was ensured, including natural light where possible, to create a bright and inviting space. Accessibility was a priority, making sure the waiting room was easily accessible for all visitors, including those with disabilities. Technology integration included access to power outlets and Wi-Fi, allowing visitors to stay connected. Privacy was addressed by incorporating dividers or separate seating areas where needed. Safety features such as smoke detectors, emergency exits, and clear signage for emergency procedures were installed. Regular cleaning and maintenance plans were established to keep the waiting room clean and sanitary.

## FURNISH

**DESIGN SELECTIONS:** The waiting room was furnished with ergonomic chairs and sofas with supportive cushions to ensure comfortable seating. Versatile furniture options were included to accommodate different preferences, with durable materials chosen for easy cleaning

and sturdy construction to withstand heavy use. Ample surfaces, such as side tables and countertops, were provided for placing personal items or refreshments. Entertainment options, including reading materials, television, and Wi-Fi access, were made available to keep guests occupied. The decor and ambiance were carefully crafted, using calming colors, artwork, and greenery to create a welcoming atmosphere. Furniture arrangements were designed to ensure easy navigation for individuals with mobility aids. Safety considerations included avoiding sharp edges or unstable furniture to prevent accidents. A regular cleaning schedule and maintenance checks were implemented to upkeep the appearance and functionality of the furnishings.

**CONCLUSION:** LPS Direct effectively designed, built, and furnished a waiting room tailored to the client's specific needs. The project showcased the company's ability to create comfortable, high-quality spaces that ensure visitor satisfaction while reflecting the client's professional image. The end result was a functional, stylish, and efficient waiting room that enhanced the visitor experience and contributed to the overall positive impression of the client's operations. This setup not only improved the waiting experience for visitors but also demonstrated the client's commitment to providing a welcoming and professional environment.
