

LPS DIRECT

ONE VISION, ONE VENDOR,
ONE EXTRAORDINARY SPACE

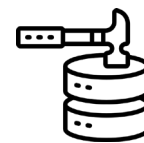

PRIVATE OFFICE SPACE FOR C-SUITE EXECUTIVES FOR LPS DIRECT

DESIGN

PROJECT OVERVIEW: LPS Direct was tasked with designing, building, and furnishing private office spaces for C-suite executives. The goal was to create an environment that is both functional and comfortable while reflecting the prestige and professionalism associated with executive-level offices.

DESIGN CONCEPT: The design focused on personalization, ensuring that each office aligned with the personal aesthetics and professional identity of the executive. The space was designed to be a reflection of their work and style. Ergonomics were a priority, with furniture chosen to support a healthy posture and reduce strain during long hours of work. Adjustable chairs and desks were key components. Privacy features were integrated, utilizing sound-absorbing materials and considering the layout to ensure visual privacy and an interruption-free environment. The offices were equipped with reliable

BUILD

technology, including ample electrical outlets and robust internet connectivity to support all digital needs. Lighting was carefully planned to create a well-lit environment, balancing natural light with adjustable artificial lighting to reduce eye strain and boost mood.

INSTALLATION CHALLENGES: When installing the private offices, careful consideration was given to space allocation, selecting locations that ensured privacy and minimal distractions, often away from high-traffic areas. Soundproofing techniques were employed, using materials and construction methods that effectively blocked or absorbed sound

to maintain confidentiality and focus. Electrical and internet setups were thoroughly planned to ensure ample outlets for all devices and reliable, high-speed internet access for seamless digital work. Lighting considerations included the installation of a combination of task lighting for work areas and ambient lighting to create a comfortable atmosphere and reduce eye strain. Ventilation and climate control were also prioritized, incorporating efficient systems or windows that could open, along with climate control options to maintain a comfortable and healthy working environment.

FURNISH

DESIGN SELECTIONS: The private offices were furnished with functional desks and chairs, emphasizing ergonomics to support posture and comfort during long work hours. The desks offered ample space for tasks and equipment. Storage solutions included bookcases and filing cabinets that not only provided ample storage

but also complemented the office's aesthetics, keeping important documents organized and accessible. Personal touches were incorporated, such as artwork, plants, or personal mementos, creating a more inviting and personalized workspace, which can enhance creativity and reduce stress. Adequate lighting was ensured through a combination of natural light sources and task lighting, reducing eye strain and creating a productive work environment. Technology accommodations were seamlessly integrated, with space for computers, printers, and adequate charging stations, ensuring all devices were easily accessible and neatly organized.

CONCLUSION: LPS Direct effectively designed, built, and furnished private office spaces tailored to the specific needs of C-suite executives. The project showcased the company's ability to create sophisticated, high-quality workspaces within budget while ensuring minimal disruption to the client's operations. The end result was a functional, stylish, and efficient workspace that enhanced productivity, comfort, and professionalism. This setup not only improved the executives' work environment but also reflected their professional identity, contributing to their overall success and satisfaction.
